Dear Hiring Manager,

I am writing to express my interest in Data Analyst opportunities within your organization. With over three years of professional experience in data analytics and business intelligence, complemented by a Master's degree in Business Analytics, I bring a strong combination of technical expertise, analytical thinking, and business-focused problem-solving.

In my previous role as a Data Analyst at Cognizant Technology Solutions, I worked closely with global stakeholders across Finance, HR, and Operations to design and deliver insightful dashboards and reports using Power BI, Tableau, SQL, and advanced Excel. I have extensive experience consolidating data from multiple enterprise systems, automating reporting workflows, and building scalable data models that support accurate and timely decision-making. My work has consistently improved reporting efficiency, reduced manual effort, and enabled leadership teams to act on data-driven insights.

I am particularly skilled in translating complex datasets into clear, actionable insights through intuitive visualizations and well-structured analytics solutions. My hands-on experience with SQL-based data extraction, Power BI data modeling (DAX, Power Query), and automation using VBA and Python has allowed me to deliver high-impact analytics while maintaining strong data governance and quality standards.

I have completed an MSc in Business Analytics at the University of Limerick, where I developed a strong analytical and technical foundation, with advanced skills in predictive analytics, data mining, and business intelligence. I am highly motivated, detail-oriented, and thrive in collaborative environments where analytics plays a key role in driving business performance.

I would welcome the opportunity to contribute my skills and enthusiasm for data analytics to your team. Thank you for your time and consideration. I look forward to the possibility of discussing how my experience can add value to your organisation.

Kind regards,

Dayanidhi Ranganathan Sampath
